

Wildlife Box Building

Our wildlife needs your help! A range of native species make use of natural and artificial burrows and in this Ranger led hands-on making experience, we ask you to build for wildlife. Depending on our conservation needs students will be supported to work in teams to build artificial penguin burrows or possum, bird or bat boxes. If it can be used at your home or school, students are welcome to take their wildlife box home or leave them to be used across Nature Parks habitat.

Experience includes: Hands-on building of a wildlife box (penguin/possum/bird), viewing and ranger interpretation using taxidermy animals.

Learning Objectives

- Supervised fieldwork
- Conservation
- Habitat
- Native species
- Features and adaptations

Level: Upper Primary – Tertiary and International

Location: Penguin Parade or Koala Conservation Reserve

Duration: 1 hour

Ranger to student ratio: 1:25

Price: \$26.00 per student

Minimum Cost: \$390.00

Equipment: Sun protection, closed shoes

Ranger facilitated session times are: 10:30am, 12:30pm and 3:00pm. Evening session times vary with the season. All ranger facilitated experiences are subject to availability.

We welcome your enquiry.
